Current position Senior Research Fellow

Melbourne School of Population and Global Health, University of Melbourne.

Statement Rob Moss is a mathematical biologist and epidemiologist, who uses mathe-

matical models to inform national pandemic preparedness and response policy, and develops near-real-time epidemic forecasting methods in collaboration with public health staff across Australia. He is also a member of the WHO Influenza Incidence Analytics Group (IIAG), where he leads the Australian discussions. Despite holding research-only appointments since obtaining his PhD in 2009, Rob is actively involved in curriculum development and delivery activities, develops interactive teaching tools, and regularly engages with

audiences outside of the academic classroom.
